Contents of Volume 29

Stability of particle aggregates in flocculation with polymers 1
K. Mühle and K. Domasch (Freiberg, F.R.G.)

Selective through-drying in fixed beds 9
Th. Riede and E. U. Schlünder (Karlsruhe, F.R.G.)

Solids concentration distribution in slurry reactors stirred with multiple axial impellers 27
F. Magelli, D. Fajner, M. Nocentini, G. Pasquali (Bologna, Italy), V. Marisko and P. Ditl (Prague, Czechoslovakia)

Optimal control of batch distillation via nonlinear programming. 33
S. Farhat, L. Pibouleau, S. Domenech (Toulouse, France) and M. Czernicki (Cracow, Poland)

Prediction of the performance of an extraction column from tracer experiments with a stationary continuous phase 39
J. Wichterlová, V. Rod and V. Hančil (Prague, Czechoslovakia)

Mass transfer characteristics of gases in n-hexane at elevated pressures and temperatures in agitated reactors. 49
Min-Yan Chang, J. G. Eiras and B. I. Morsi (Pittsburgh, PA, U.S.A.)

BOOK REVIEWS 61

Bubble behaviour and flow structure of bubble columns 65
B. P. Yao, C. Zheng (Beijing, China), H. E. Gasche and H. Hofmann (Erlangen, F.R.G.)

On the evaluation of the interfacial turbulence (the Marangoni effect) in gas (vapour)–liquid mass transfer. Part I. A method for estimating the interfacial turbulence effect. 77
Kr. Semkov and N. Kolev (Sofia, Bulgaria)

On the evaluation of the interfacial turbulence (the Marangoni effect) in gas (vapour)–liquid mass transfer. Part II. Modelling of packed columns accounting for axial mixing and Maragoni effects 83
N. Kolev and Kr. Semkov (Sofia, Bulgaria)

Pressure drop in irrigated packed columns 93
J. Maćkowiak (Dinslaken, F.R.G.)

Effect of operating conditions on the characteristics of pressure fluctuations in a bubble column 107
J. Drahoš, J. Zahradník, M. Punčochář, M. Fialová and F. Bradka (Prague, Czechoslovakia)

TECHNICAL NOTE
Heat transfer in rough tubes 117
R. Numrich (Paderborn, F.R.G.)

An experimental study of non-Newtonian fluid flow in fluidized beds: minimum fluidization velocity and bed expansion characteristics. 121
B. K. Srinivas and R. P. Chhabra (Kanpur, India)

Extended empirical Freundlich isotherm for binary systems: a modified procedure to obtain the correlative constants 133
G. McKay and B. Al-Duri (Belfast, U.K.)

An equation of state for systems containing electrolytes and nonelectrolytes 139
H.-G. Simon (Höllriegelskreuth, F.R.G.), H. Kistenmacher (Dresden, F.R.G.), J. M. Prausnitz (Berkeley, CA, U.S.A.) and D. Vortmeyer (Munich, F.R.G.)

Scale-up effects due to near-wall channelling in isothermal adsorption columns: on the limitations in the use of plug flow models. 147
J. Tobiś (Warsaw, Poland) and D. Vortmeyer (Munich, F.R.G.)

Vapor–liquid equilibria at high temperatures and pressures in binary mixtures containing H_2, CH_4 and CO_2 with high boiling hydrocarbons: experimental equipment and results 155
U. Wäterling, D. Zheng and H. Knapp (Berlin, F.R.G.)

Experimental determination of the optimal geometry of baffles for heat transfer in an agitated vessel 165
F. Stręk and J. Karcz (Stettin, Poland)

 ©Elsevier Sequoia/Printed in The Netherlands

Production of commercial dyes via impingement-sheet mixing.
Part I. Testing of a device suitable for industrial application. 173
Part II. Results of laboratory experiments 179
R. J. Demyanovich (Oakland, CA, U.S.A.)

A study of a heat pump distillation column system 185
I. Björn, U. Grén and K. Ström (Gothenburg, Sweden)
